Cal OES Activation Status

State Operations Center

Normal Operations

Inland Region EOC

Level 3

Coastal Region EOC

Normal Operations

Southern Region EOC

Normal Operations

Cal OES INLAND REGION

Train Derailment, Oxnard, Ventura, SPILL: 18-6020

On 09/06/18 at 0839 hours, the California State Warning Center (CSWC) received a report from the Union Pacific Railroad (UPRR) advising that 3 railcars loaded with Wood pulp and 3 empty railcars derailed in the upright position due to unknown causes.

- There were no hazardous materials released and no injuries reported.
- CSWC personnel performed notifications per SOP.
- See Fire Activity Slides

Cal OES COASTAL REGION

On 9/06/18 at 0900-1500 hours Coastal REOC is activated due to Yellow Command (YC) Exercise. The 2018 Yellow Command Full Scale Exercise is designed to engage all levels of Emergency Operations Centers (EOCs) to promote collaboration and coordination between jurisdictions and agencies as will be necessary in a catastrophic incident with regional impacts. The exercise will include 18 full scale shelter operations and 55 local EOC / DOC activations throughout the Bay Area. Key areas within care and shelter operations to be exercised include: integrating medical services in a general population shelter, sheltering of animals, and inclusive accommodations for all individuals including those with access and functional needs.

- Counties activated for YC are: Santa Clara, Monterey, San Francisco, Alameda, San Mateo, Napa, Sonoma, Santa Cruz, Contra Costa, Solano and Marin.
- 1 Cal OES Coastal Region Senior ESC is deployed for exercise
- 4 Cal OES Coastal Region ESC are deployed for exercise
- 1 Cal OES Inland Region Senior ESC is deployed for exercise
- 1 Cal OES Inland Region ESC is deployed for exercise
- See Fire Activity Slides

Active Weather Warnings, Watches and Advisories by County:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

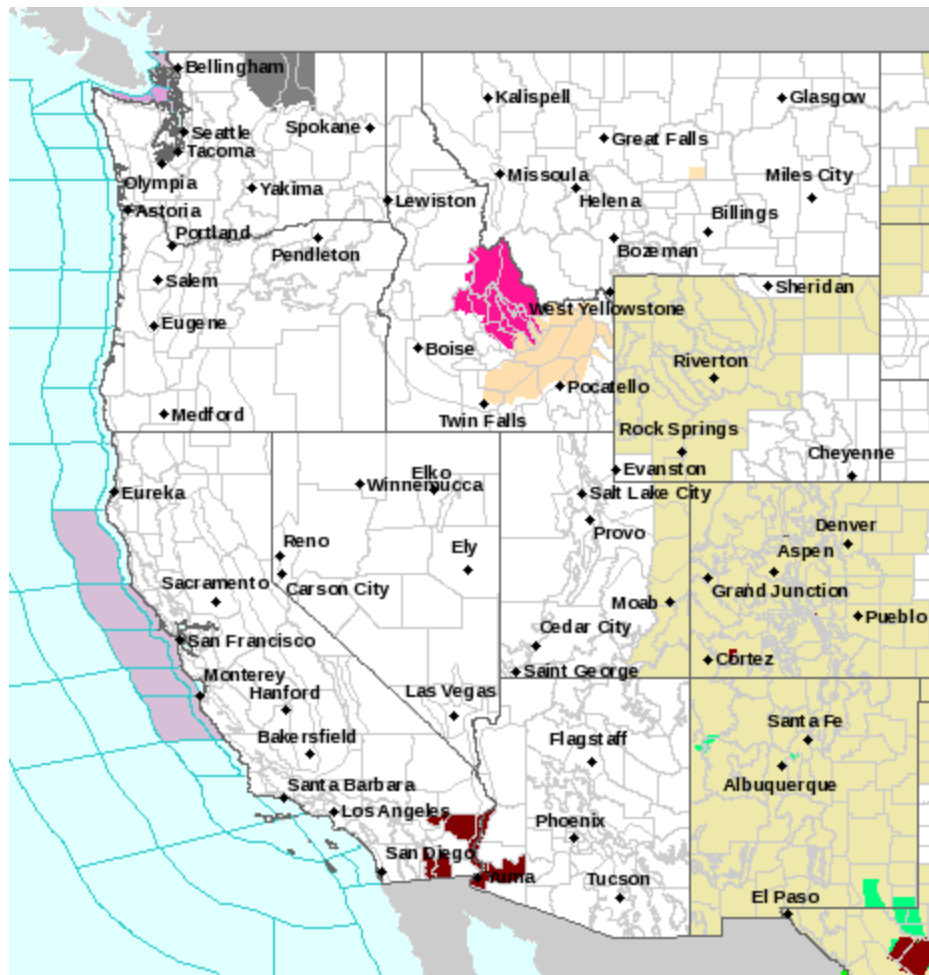

- Gusty afternoon W winds and low relative humidity (RH) Friday east slopes of Coast Range into far Western Sacramento Valley
- Gusty, mostly SW wind with RH early next week near and E of the Cascade/Sierra crest
- Low pressure trough offshore will have most influence over the region for the next 7 days, no thunderstorms or precipitation expected
- Gusty afternoon W winds/low RH developing Friday east slopes of Coast Range into far Western Sacramento Valley, gusts mostly 15-25 mph, locally to around 30 mph.
- Winds otherwise will be lighter today most areas with not much change Friday
- Weekend-onward winds include daily gusty, W to NW winds ocean to Coast Range crest and gusty, mostly SW wind/low RH expected early next week near/E of Cascade Sierra crest
- Even without wind, low afternoon RH/poor to moderate overnight RH recovery at least through the weekend will be fairly wide spread with areas of overnight thermal belt conditions developing mid and upper slopes
- Temperatures somewhat above seasonal values inland next few days, warmest locations mid and upper 90s, followed by cooling next week to more seasonable values in the lower 90s warmest inland places

SOUTHERN CALIFORNIA

- High pressure over the Pacific will expand eastward, resulting in much warmer weather the next few days. Breezy conditions will develop each afternoon along the central coast which will transition into nighttime sundowner winds across Santa Barbara County and north winds along the I-5 Corridor. Cooler, onshore flow is expected to return for the balance of next week.
- Maximum temperatures today will reach the upper 70s to lower 80s in the mountains to the lower 90s in the valleys, warming another 3-5 degree Friday. Saturday will be the hottest day with highs of 100-103 in the valleys. Slow cooling trend Sunday and Monday before temperatures fall to below normal next Wednesday.
- Northwest winds of 15-25 mph each afternoon along the central coast through Sunday. Local north winds of 10-20 mph tonight in Santa Barbara County and the I-5 Corridor. North winds increasing to 15-25 with gusts to 40 mph in these areas Friday night/Saturday morning.
- Minimum humidity will be mainly between 15%-25% above and inland from the marine layer today. Look for RH minimums to drop into the 8-12% over most areas below 7,000 feet over the weekend. The lowest readings may occur along the central coast interior over the weekend. Only fair recovery across mid slope elevations with thermal belts forming due to clear skies overnight.
- Possibly turning windy in the Sierra high country into the western Owens Valley during the latter half of next week.
